DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it is not clear how the requirement to operate the parts of the apparatus limit the claimed method. It has been held that to be entitled to weight in method claims, the recited structure limitations therein must affect the method in a manipulative sense, and not to amount to the mere claiming of a use of a particular structure. *Ex parte Pfeiffer*, 1962 C.D. 408 (1961). The instant claims require only the parts of the apparatus be used, but do not recite any manipulative steps involved.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of Smith (US Patent No 3,039,285), Spendel (US Patent No 4,489,455) and Minayoshi et al (US 200100115082 and JP 2001-178985).

All cited documents teach methods comprising conducting washing and drying cycles according to an operational program and thereafter conducting drying. The documents teach operation of pumps fans, heaters, motors, and valves during drying.

See entire documents, especially Description of the Preferred Embodiment in Minayoshi et al, columns 5-14 in Spendel and columns 1-3 in Smith.
